## SPECIFICATION

|                          |                                                                                                 |
|--------------------------|-------------------------------------------------------------------------------------------------|
| Heating output           | 10 kW                                                                                           |
| Power input              | 2.8 kW                                                                                          |
| Power supply             | Single phase                                                                                    |
| Required circuit breaker | 20 A, D curve                                                                                   |
| Nominal run current      | 15 A                                                                                            |
| Minimum flow rate        | 0.27 litre / second                                                                             |
| Recommended flow rate    | 0.54 litre / second                                                                             |
| Water connections        | 25 mm BSP                                                                                       |
| Dimensions, L × W × H    | 1070 × 440 × 1180 mm                                                                            |
| Weight                   | 120 kg                                                                                          |
| Buffer tank              | Yes                                                                                             |
| Circulation pump         | Yes                                                                                             |
| Heating output basis     | 8 °C wet bulb and 38 °C water temperature                                                       |
| System type              | Open vented — not suitable for pressurised systems                                              |
| Warranty                 | 2 years parts and labour — compressor, evaporator coil, heat exchanger and refrigeration system |
| Manufacturer             | Hot Water Heatpumps Ltd                                                                         |

Installation clearances and unit views, dimensions in millimetres

## CHAMPION HEATING LTD

Auckland hydronic and pool heating specialists.

Figures are manufacturer data and subject to change without notice. Champion Heating Ltd is an independent supplier and installer; brand names identify the products we supply.
